Mechanical Breakdown Warranty

The following components are covered against Mechanical Breakdown (as defined elsewhere in this document) of those items listed below.

Please note that parts not listed are specifically excluded.

Engine – All components contained within the cylinder block and head including pistons, rings, crankshaft, big end bearings, manifolds, rocker assembly, timing chains, timing gears, distributor drive. Excluding Dual Mass Flywheel.

Turbo Unit – All components including inlet and exhaust turbine shafts, bearings, bushes, wastegate devices. Turbo cover ceases at 7 years or 80,000 miles whichever comes sooner.

Gearbox – All components contained within either manual or automatic transmissions including gears, bearings, clutches.

Clutch – All components including clutch plate, clutch cover, thrust bearing and or release bearing. Limited to one clutch repair during the warranty duration.

Differential – All components including gears, pinions, bearings, shafts.

Drive Shafts – All components including propshaft, drive shafts, C.V. joints, couplings.

Steering – All components on steering systems including power steering units, rams, pumps, reservoirs, steering box.

Propshafts – Propshaft including universal joints and bearings.

Suspension – All components including control arms, bushings, ball joints, pins.

Bearings – All components including wheel bearings, seals, hubs, flanges, where mechanical breakdown has occurred causing sudden stoppage of their function.

Cooling System – All components including radiator (excluding external damage), matrix, water pump, head gasket, thermostat.

Ventilation – All components including heater assembly vents, tubes, controls.

E.C.U. – All components including solid state control units, triggering units, distributor, coil.

Electrics – All components including motors, solenoids, relays, alternator, starter motor, switches, computers.

Braking System – All components excluding brake discs and brake pads.

Fuel System – All components including fuel pump, carburettor, sender units, gauges, air flow meters, accumulator fuel distributor, regulators.

Air Conditioning – All components including compressors, pumps, reservoirs.

Locks – All components including regulators, handles, locks, catches (excluding accidental damage).

Seals – All major oil seals and gaskets.

Casings – Casings are covered if they have been damaged by any of the listed parts.
